

## Give a Gift that Grows

*There is no greater gift to share than the joy of slow and mindful living.*

*Each SeedCell is more than just a seed; a reminder to take time off our screens, to make things happen with our own two hands. Your guests will be gifted the fulfilment of watching things grow, and the satisfaction of eating their own organic crop.*

*Give a gift that grows!*

## Beginner Friendly

*The natural pulp material which makes up each SeedCell will absorb any ground moisture once planted. It helps to deliver a steady feed directly to the seed, aiding the germination process. It also continues to provide water to the newly emerging seedlings even after germination.*

*Growing your own crop has never been easier.*

## Make it Special!

*We accept customisation requests.*

*Customisation Charges:*

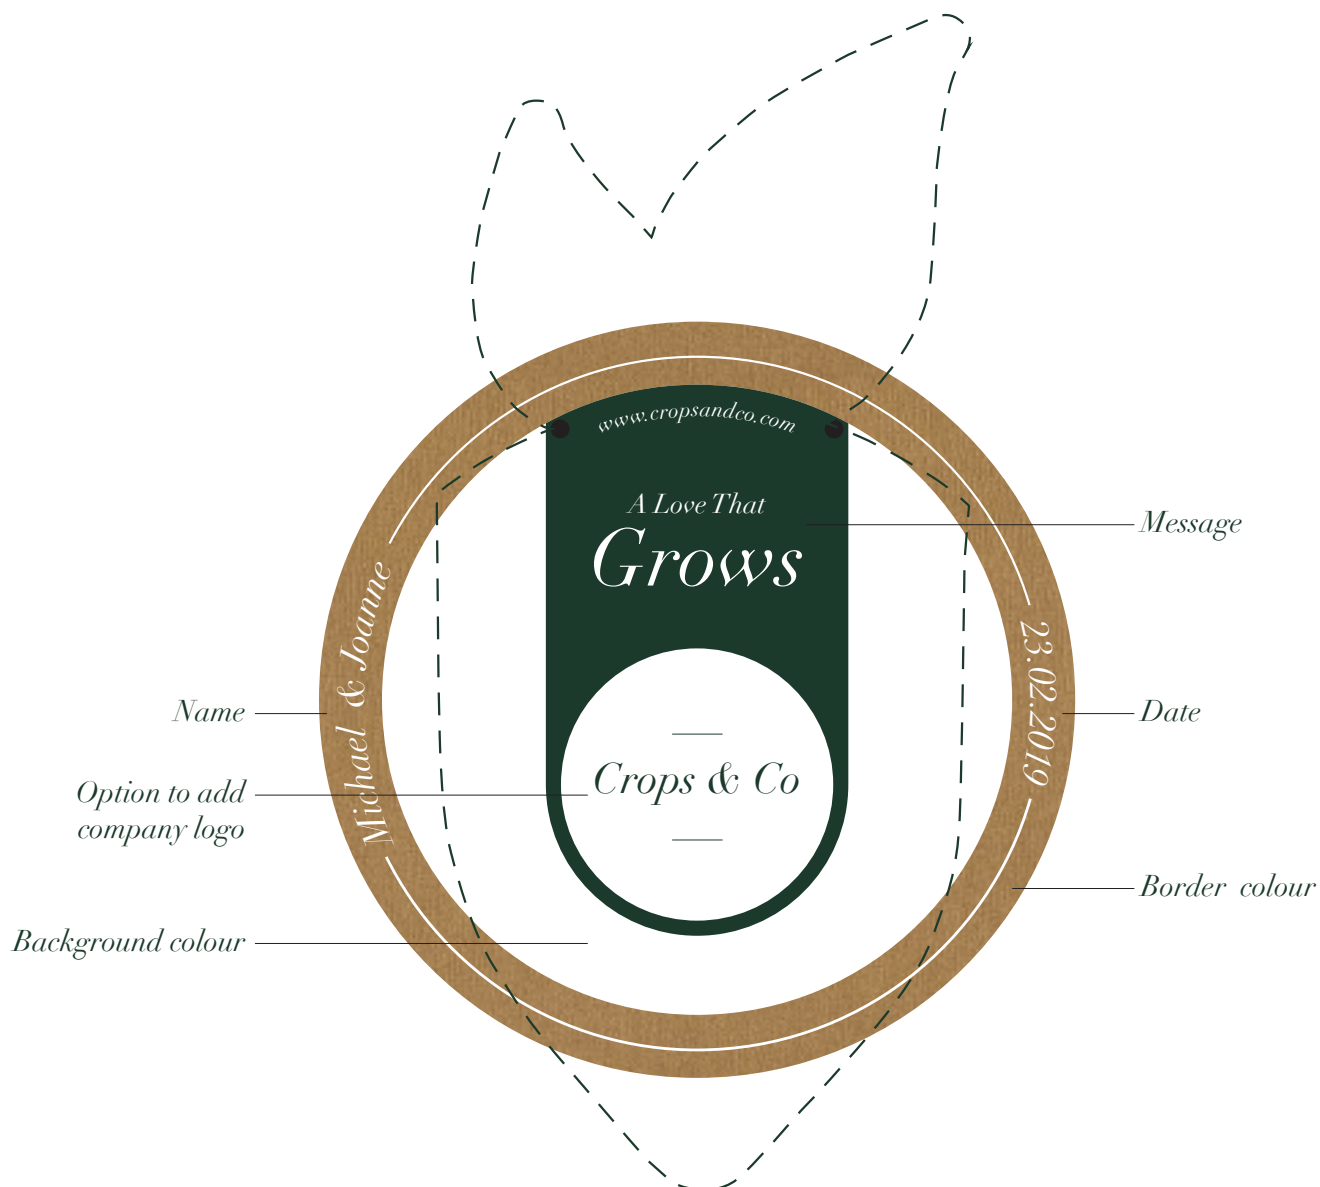

*Quantity < 50 nos. : \$25.00*
